LAST OF THE ELMS

When William H. McGuffey, author of the celebrated McGuffey Readers, came to Ohio University as president in 1839, he was struck by the barren appearance of the main campus. So he set out 17 young elm trees in a double row across the campus. The McGuffey Elms grew to form a majestic landmark that held a prominent place in the hearts of several generations of students, until disaster struck five years ago. The villain was phoelm necrosis, better known by its alias, Dutch elm disease. Today this lone McGuffey Elm remains as the reminder of a once proud campus showpiece.

THE COVER

Behind the self-explanatory sign on a modern Ohio University laboratory, a graduate student works on a research project sponsored by the National Science Foundation. The accompanying article beginning on page four takes you behind the scenes of an unheralded phase of America's scientific progress.

THE OHIO ALUMNUS is published monthly in October, November, December, January, March, April, May & June by The Ohio University Alumni Association. The annual subscription rate of \$4.00 includes membership in The Ohio University Alumni Association. Remittance should be made by check or money order payable to The Ohio University Alumni Association, P.O. Box 285, Athens. Entered as second class matter, October 3, 1923, at the post office at Athens, Ohio, under the Act of March 3, 1879. Printed at The Lawhead Press, Inc., Athens, Ohio.

Defense In Depth

Through the National Science Foundation, universities play a major part in the nation's scientific progress

TODAY A MONKEY rides off into space. Tomorrow a man takes his place. After that, who knows?

This is the unbelievable pace of scientific progress. Americans are familiar with the end results. Each day's newspaper is a chronicle of scientific history.

But how are these accomplishments being made? And by whom?

Public discussion following the comparatively recent widespread concern over scientific accomplishments has brought out the fact that Americans customarily think of science in terms of applied work. Research is easily defined, but somewhat removed from the action at hand. Basic research is more remote, and not even easily defined.

The U. S. Press itself, usually interested in "the story behind the story" remains content, for the most part, to settle for the "outer glow" in science.

As a result, general evaluation of the field of science approaches the impression that led a high school senior this year to ask an Ohio University representative if the school "has a course that teaches you how to build a moon rocket."

The average tax payer is well aware that Government expenditure for scientific weapons has increased rapidly. He also knows that industry is paying more attention than ever before to development, in addition to production.

But behind it all is another major element. It is the foundation upon which development and production are pyramided. It is the basic research and the advance of basic scientific knowledge, much of which

is supplied by the American university. And it is not as indirect in its application to national security as may be imagined.

Not long ago a city newspaper contacted Ohio University's News Bureau. The reporter was interested in a story on university research. Referring to one scientific project, he asked, "What specific thing is the professor attempting to discover?"

When told that the project was in basic research and that the professor was exploring a field with no specific object in mind, the reporter expressed amazement and concern that such "aimless" work was going on.

Had the professor been exploring an unknown cave or jungle, rather than an area of chemistry, he would not have been expected to describe in advance the things he expected to find.

This is not meant as a criticism of American newspapers. In the competition for exciting news, they cannot concern themselves to any extent with accounts of exploratory research.

It does, however, explain in part why the launching of a Russian satellite could create the immediate impression that the United States was behind in the field of science—despite the fact that in 13 years this country had received 34 of 67 Nobel Prizes awarded in physics, chemistry and medicine. It emphasizes the shroud that hides an important phase of U. S. progress in science.

Epoch-making Discoveries

As history amply records, the most epoch-making scientific discoveries have come from basic research. But basic research, being exploration into the unknown, cannot predict exactly where its breakthroughs will occur.

Realizing this, the U. S. government in 1950 under-

took to find a means of increasing fundamental research and still remain within the limits of national economy. One obvious solution lay in the talent and facilities on the American campus.

If financial assistance could be given to universities, a stepped-up program of basic research could be accomplished immediately, producing also the important by-product of advanced training for young scientists.

But centralized control over science was not desirable in a democratic society. Therefore, an independent agency within the executive branch of the government was formed by an act of Congress.

Named the National Science Foundation, it began to operate as a private foundation, except that it was government financed.

Major Objectives of Foundation

From its inception the National Science Foundation had two major objectives. One was to provide the means for increasing basic research on university campuses in order to learn all the possibilities of progress in technology and choose carefully the fields for rapid development. The second objective was to help improve science education, a prerequisite for raising the quality of scientific manpower.

From that beginning has come a program that reaches every major campus in the country, covers nearly every conceivable division of physical and natural sciences, and is now expanding into the social sciences.

Campus research, made possible by the Foundation, has earned the highest praise from government and industry, and the respect of foreign powers.

Dr. Chester I. Barnard, second chairman of the Board, has pointed out that the Foundation cannot police or direct activities of other organizations. Its role, he explained, is

one of leadership, not direction, in the broad effort to promote science and to assess the need.

In its early years NSF established a system whereby scientists throughout the nation, in every field, gave their advice in many of the day-to-day decisions. Advisory committees and panels of distinguished scholars and scientists were consulted on all matters brought before its small administrative staff, headed by Dr. Alan T. Waterman.

The major programs were initiated within the framework of what soon became two divisions. These were the Division of Biological and Medical Sciences and the Division of Mathematical, Physical and Engineering Sciences.

The Congressional Act establishing the Foundation, however, included the phrase "and other sciences", giving NSF permission to establish support programs wherever the need became apparent.

Acting under this authority, the Foundation undertook in 1953 a study of the status of social sciences and the following year a limited program was approved. These activities were combined into a separate Social Science Research Program in 1957.

Variety of Support Programs

Research support for universities today is quite varied, and is keyed to the requirements of the individual scientist.

Grants may provide for equipment, services, expendable supplies, graduate and undergraduate assistants, publication costs, travel expenses and many other costs directly related to the project.

They may cover a period of up to five years, or they may be made for the purchase of a permanent piece of specialized research equipment.

In any case, the research grants now are initiated by the university or the individual scientists. Applications are

evaluated by the Foundation's professional staff, with the advice of other competent scientists, and final approval is made by Director Waterman.

The Foundation in this way undertakes to provide grants where it is clearly in the national interest and where necessary funds cannot be obtained from other sources.

Help Those Who Help Themselves

In most cases NSF support must be supplemented from other sources, and it is here that the universities, through their alumni fund drives, must be in positions to show that they can help finance worthy projects.

The programs are directed toward helping both young scholars and recognized scientists further their scientific training, and helping science teachers increase their knowledge of the subject matter of their fields.

After the grant is made, responsibility for administration of the proposed scientific activity belongs to the grantee.

The task is not easy. The accelerating pace of discovery creates an almost overwhelming mass of new scientific knowledge.

If tomorrow's need for scientists is to be met, America cannot afford to develop a great gulf between research scientists, primarily concerned with the acquisition of new knowledge, and teachers, who are concerned with the diffusion of knowledge.

The National Science Foundation, together with such private groups as the Ford and Rockefeller Foundations, is working vigorously to bridge this gap. But the entire program, carried out through hundreds of colleges and universities, must have public support.

This is America's defense in depth. Without it the more glossy outercoating of satellites, missiles and miracle drugs would soon disappear.

SUMMER INSTITUTE FOR COLLEGE TEACHERS

College teachers of freshman chemistry spent six weeks gaining new concepts in organic, inorganic and physical chemistry, at one of two summer institutes directed by Dr. Lawrence P. Eblin, professor of chemistry. The National Science Foundation has supported similar institutes since 1953 on the basis of proposals submitted by the universities who want to participate.

SUMMER INSTITUTE FOR SCHOOL TEACHERS

The other summer institute directed by Dr. Eblin, also supported by NSF, enabled high school teachers of science to get advanced summer training. In addition to classroom and laboratory work, they met with noted scientist visiting the campus from various parts of the country. As in the institute for college teachers, each participant received a stipend of \$75 per week plus expenses.

PHOTO BY DON MOORE

HIGH SCHOOL SCIENCE WORKSHOP

From more than 800 applicants, 80 top high school science students were selected to attend a three-weeks workshop at OU. One of several such programs financed by NSF, the OU workshop was the only one in Ohio. Directed by Dr. William Gambill, associate professor of botany, it offered training in nine areas of physical sciences.

UNDERGRADUATE RESEARCH PARTICIPATION

A new project this year provided some 120 grants to universities who could bring in undergraduates qualified to participate in summer research being conducted by competent scientific investigators. At Ohio University 10 students from six Ohio Colleges carried out research problems under the supervision of Dr. Jesse H. Day, professor of chemistry.

SCIENCE FACULTY FELLOWSHIP

Fellowship awards by NSF are given to scientists in support of study or research covering the fields of mathematical, physical, medical, biological and engineering sciences, including anthropology, psychology, and selected social sciences. Dr. Thomas H. Curry, associate professor of chemical engineering (opposite page) is one of the Fellowship recipients, and studied this year at the University of Michigan. The Foundation also has some \$100,000 currently invested in seven research projects being conducted at Ohio University.

IN-SERVICE INSTITUTE FOR TEACHERS

Designed especially as supplemental instruction in science and mathematics, the Foundation's in-service institutes are organized at 182 U. S. colleges. Through courses offered on Saturdays and during after-school hours, these teachers get advanced training during the regular school year. At Ohio University the program is directed by Dr. Carl H. Denbow (left), professor of mathematics.

The Mystery of MEMORY

EVERYTHING you know, and nearly everything you do is based on the information you have stored in the treasure house of your mind—your memory. Yet, it is surprising how mysterious and downright unreliable this treasure house can be.

You may be driving through a village which you know you have never seen before, but all of a sudden it seems that you know the route would turn right at the village square, go down a hill and over a bridge with a mill-pond on your left.

This false recognition is known as *deja vu*. It is explained by there being just enough that is old and familiar in the new situation to give a rise to a feeling of familiarity, which seems to be the minimum requirement for recognition.

A college boy has two roommates for much of his college life. Shortly after graduation he marries, and on an occasion when his wife is to be away, he asks a couple of fellows to come over for the evening.

Now he is in a familiar social situation and the topics of conversation at that age are likely to be about the same as in his college days. To be sure he never sat in that room with those two men and talked about these things, but he often sat in other rooms, with two other men and talked about these things.

So now it seems to him that he is re-living a previous experience. About the last third of each semester I have this feeling about nearly everything I say to my classes.

Everything Seems Strange

An opposite, and probably less common experience is a feeling of strangeness in the midst of the familiar. A student leaves home for college and does not return until Christmas. He then feels that everything is strange and different. Home was never like this. There is a haunting feeling of unreality.

Actually everything is the same except that the piano and davenport have changed places, mother has moved the canary's cage, and cocker spaniel Blackie has died and been replaced by Taffie.

The return to college after one's freshman year and a summer at home provides such a perfect setting for this experience that, if I were naming things, I would call it the sophomore syndrome.

Sometimes recall occurs without recognition. Probably most of us deliver ourselves of witticisms at times supposing

Most of the things we do, even our system of justice, depend on the most unreliable mechanism we possess.

By Dr. Amos C. Anderson

PROFESSOR OF PSYCHOLOGY

them to be original when in reality we have heard them before.

In a few seemingly well authenticated cases this has led to unconscious plagiarism. Helen Keller is said to have written a story, while still a young girl, for the magazine of the Perkins Institute. It was found to be a reproduction in slightly different words, of a story which had presumably been read to her in her early childhood. She recalled the story but did not recognize it as something she had experienced before.

The Truth Diminishes

It has been shown that if people are permitted to describe incidents in their own way, most of what they report is true but much will be left out. Under questioning the amount reported increases but the accuracy diminishes.

It hardly needs a series of experiments to demonstrate that the greater the elapsed time between an observed incident and the reporting of it the less detailed and accurate the report will be. It is likewise obvious and has been experimentally verified, that events observed under conditions of either great excitement or complete indifference are poorly observed and inaccurately reported.

The implications of these facts for courtroom procedures would seem clear, yet so far as I know they have received little or no recognition on the part of our legal institutions.

A remarkable series of incidents bearing on the reliability of testimony occurred in Monroe County, Missouri, many years ago. It is reported in an old book by Edgar James Swift who taught at Washington University for most of his professional life.

In 1871 Alexander Jester and Gilbert Gates were travelling eastward from Kansas. Jester had a light spring wagon drawn by two small ponies. Gates, a young man returning home from homesteading in Kansas, had a prairie-schooner drawn by a pair of heavy horses. They were travelling together, making expenses by exhibiting three young deer and a buffalo calf.

Somewhere in the vicinity of Paris, Missouri, Gates disappeared. Jester stopped overnight at Paris in possession of both outfits, and shortly after leaving the town was arrested and accused of the murder of Gates. He claimed at the time that Gates had sold him his outfit in order to hurry home by rail.

Jester escaped, but was arrested and brought to trial in 1901, thirty years after the event.

When the trial was held, two women described the size and color of all the horses, and the appearance of Jester, who, they said, was over six feet tall, weight about one hundred and eighty pounds, with a hooked nose, gray eyes, powerful physique, and large hands. They further testified that looking into the first wagon as it approached, they saw lying in the bottom the outline of a human form under a buffalo-robe.

They gave this testimony confidently, thirty years after the alleged crime. They would have been twelve and fourteen years old at the time, there was a heavy snowstorm going on when and if they met Jester, and they said that they were riding at a canter, were wearing veils, and that Jester's horses were trotting.

A farmer swore that the buffalo-robe was covered with blood, and another witness swore that while helping Jester start his wagon, the wheels of which were frozen in the mud, the canvas blew back and he saw a young man with his throat cut.

A man who would have been six years old at the time of the murder, if murder there was, testified that during the spring thaws he and his father saw the body of a young man floating down the stream. He described the color of his hair, his complexion and mentioned a blue checked shirt the description of which agreed with that of Mrs. Gates, the mother, of a shirt she had made for Gilbert.

One wonders how well the colors described would have been preserved after a considerable part of the winter in the river.

These witnesses were not liars or bad people. The attorney for the defense, against whose case they testified, said they were among the best citizens of the county.

Pinkerton detectives and outside attorneys were brought in to aid in the prosecution. The crime was reconstructed in local newspapers, with detailed descriptions of Gates, Jester, the horses, wagons and Gilbert's shirt which his mother had made. Under skillful questioning, before and during the trial, witnesses were led to believe, first that they might have seen, then that they did see, the things reported.

I have read this story to my classes several times, but not for three or four years. In preparing this article I wrote it from memory. Upon checking Professor Swift's book, I

(Continued on Page 31)

DR. EDWIN WATTS CHUBB

Epilogue of Greatness

Death ends the long and fruitful career of one
of Ohio University's most inspiring educators

"WE OFTEN hear that it is a great privilege to sit under a great teacher, and we think of Paul at the feet of Gamaliel. But have you ever thought what it must have meant to Gamaliel to have a Paul in his class? I am no Gamaliel and I may never have had a Paul, but I can testify to the value of the inspiring student."

With these words, Dr. Edwin Watts Chubb many years ago expressed the sentiments that made him one of the most devoted educators and inspiring figures in the long history of Ohio University.

Today Dr. Chubb is dead. He died quietly at his daughter's home in Wilmington, Delaware, on July 6, just a few weeks before he would have been 94 years old.

But the influence of this humble man, who was the only dissenter in the belief that Ohio University's library should be named for him, would be difficult to measure. Alumni throughout the world remember his inspiring lectures on Shakespeare, whom he considered "history's keenest appraiser of man's morals." Hundreds of former students came under his direct counsel during the 29 years that he was dean of the Liberal Arts College, now known as the College of Arts and Sciences. Some others remember him as the acting University president following the deaths of Presidents Alston Ellis and E. B. Bryan.

Born in Lebanon, Pa., in 1865, Edwin Watts Chubb was reared in the strict tradition of a 19th Century minister's family. His father was the Rev. Samuel Chubb.

By 1887 Dr. Chubb had graduated from Schuylkill Seminary and Lafayette College. Later he received his A. M. and Litt. D. degrees from Lafayette. Although the Doctor of Literature ordinarily was conferred on an honorary basis, Dr. Chubb's was earned by study under Dr. F. A. March, one of the leading English scholars of his time.

A teacher in state normal schools of Pennsylvania and Wisconsin for several years after graduating from Lafayette, Dr. Chubb spent the summer of 1893 as a student at Cambridge University in England. A year later he and his wife, Eve, whom he had married in 1892, saved enough money

to spend a year studying at the University of Berlin, Germany.

"I got a minimum of fact or culture from the German university," Dr. Chubb recalled later, "but outside the university every hour was instructive."

In 1900 Dr. Chubb accepted a position as professor of English at Ohio University, where he was soon to become one of the most colorful figures on the campus.

Students flocked to his classes in English to hear him extol the works of his favorite poet, whose name he always spelled "Shakespere." No one seemed to mind being singled out for the frequent pointed and personal jibes the jaunty professor liked to hurl at his students.

These comments, described as "bits of scholarly razing," came suddenly and sometimes painfully to students who had not prepared their lessons. Beginners usually reacted in varying degrees of petrification, but veteran Chubb pupils knew they were free to respond as caustically as they had been attacked. Obvious signs of pleasure were in fact noticeable in the humor-loving prof when a student was able to match the sharpness of his barbs.

"I like a manly independence," Dr. Chubb often said. "I like the student who has opinions of his own and who is not afraid to express them in a respectful manner."

As to the teaching profession, the devoted professor had "little respect for a teacher who wants every student to be an echo of his own thought, or of his own sounding brass and tinkling cymbal."

Dr. Chubb described a sincere teacher as one who "will acknowledge at times the presence of a mind whose native quality is superior to his own." He qualified the statement by adding with a smile that he did not mean that the teacher must acknowledge that the student may know more than himself. "Heaven forbid that I should be guilty of such heresy," he said.

The professor's perpetual enthusiasm for his work was

(Continued on Next Page)

heightened even more when he recognized the presence of what he termed a "choice spirit" in his classroom.

"What are the characteristics of such a rara avis?" he would ask his colleagues. "Is it that he is prompt, methodical, always attentive, always a top grade getter?" Then he would answer his own question: "Possibly he has these qualities, but not necessarily all of them. My most inspiring pupil is not always the one who receives an 'A', though I must confess that he is more likely to be an 'A' student than a 'D'. Nor is it the one whose opinions always agree with mine. But he is wholesome and sincere and intellectually keen. He is so wide-awake that the best you have to give never escapes him; so sincere that he serves as a touchstone to your own sincerity; so wholesome that he serves as the salt of the sea and the ozone of the air, to keep all things pure and free from putrefication."

Avid Sports Fan

Small in stature, but nevertheless an imposing figure who commanded immediate respect, Dr. Chubb enjoyed roaming the campus, speaking with students and colleagues. He was an avid fan of all Bobcat athletics and a serious participant himself in tennis, golf and billiards. He also was an expert chess player who played in world-wide tournaments via mail.

After he had been at Ohio University seven years, Dr. Chubb was appointed dean of the Liberal Arts College. Throughout the 29 years of his deanship, however, he continued to teach at least one course (usually Shakespeare) in English. He kept count of the number of students (more than 9000) who had enrolled in his courses, and this was always his greatest source of pride.

When Dr. Alston Ellis died in 1920, Dean Chubb became acting president for a year. During that administration the money to build Men's Gymnasium was secured.

Dean Chubb's tremendous love and appreciation of good books was recognized in June of 1931 when the Edwin Watts Chubb Library was opened at Ohio University. It was one of the few times that a campus building has been dedicated in honor of a man while he was actively associated with the University. The dedication was pointed out just last year by Dr. Chubb as being the highest honor of his life.

In 1934 Dr. E. B. Bryan died suddenly, and again Dean Chubb was called upon to serve as active president for a year. When the new president was brought to Athens, Dr. Chubb returned to the office of dean for two more years before retiring in 1936.

After 36 years at Ohio University, Dean Chubb looked back on many satisfying accomplishments. But he also looked forward to a busy future as a professor emeritus.

Author and Lecturer

Widely known as an author and lecturer (Four books used in scores of colleges; dozens of articles in Atlantic Monthly, Scribners, and other top magazines; more than 500 speeches throughout the East and Mid-West) he continued to write and speak.

Dr. and Mrs. Chubb remained in Athens, although

DURING HIS DAYS as dean of liberal arts, Dr. Chubb counseled hundreds of students, with the hope that he could help them learn to "know accurately, reason correctly, feel soundly and grow steadily."

they spent a great deal of time visiting their daughter, Mrs. W. C. Munds (Catharine Chubb, '18), then living in Corpus Chirsti, Texas, and their son, Edwin D. Chubb, '21, in Cheshire, Conn. (Edwin died in 1957).

Mrs. Chubb, who also had been a favorite of Ohio U. students and faculty, died after an extended illness in 1944.

To be nearer his children, Dr. Chubb moved to Wilmington, Delaware in 1952, where he lived with Catharine and her husband, who had gone there as rector of Christ Episcopal Church.

However, Dr. Chubb's body was returned to Athens for funeral services in the Helen Mauch Galbreath Memorial Chapel.

The Chubb House

In 1954 the Chubb home at the corner of Court and Mulberry Streets was taken over by Ohio University. It was used for two years by the English Department then, to the delight of Dr. Chubb, it was made into a residence for graduate students. Now known as Chubb House, it is occupied by 15 women enrolled in graduate college.

Dr. Chubb considered his mission in life the opportunity to help young people learn to "know accurately, reason correctly, feel soundly and grow steadily."

A recording of his voice contains these words: "I am here acknowledging a debt that I owe. I am paying a tribute I have never paid. Before it is forever too late, I wish to bring my crown of wild olives as a votive offering to the students, living and dead, scattered from Maine to Oregon, who are the chosen few belonging to the "Choir invisible, Whose music is the gladness of the world."

Quality and the Scholarship Movement

By Myron A. Hutcheson

DIRECTOR OF STUDENT FINANCIAL AIDS

THE SCHOLARSHIP program at Ohio University has grown as rapidly as the school itself in the past few years. Undoubtedly, the program has had a very profound effect on the caliber of students attracted to Ohio University and also has attributed to the actual growth of the student body.

All types of financial aid are centralized in one office, the Student Financial Aids office. The Student Financial Aids office was established at Ohio University in 1953 and was under the direction of Mr. Edward A. Sudnick from that time until 1957. Centralization of the aids program has contributed to the betterment of Ohio University.

There are four sources from which scholarship money is derived. The bulk of the scholarships are waived, which simply means that the university does not collect tuition or fees from scholarship recipients.

A second source is money derived from funds that are endowed with the state. Most of these scholarships are endowed at a value of \$2,500 from which the university collects six per cent yearly interest which is used for scholarship purposes. Such a scholarship is a lasting memorial and is granted each year.

The third source for aid to scholarship students is by a direct gift to the Ohio University Fund Scholarship Account. This last academic year a total of approximately \$10,000 was awarded

to worthy scholars through such gifts.

The fourth source for scholarship funds is through money donated to the Ohio University Fund for a specific purpose or person. These scholarships are usually designated by an outside group or individual, and for this last academic year a total of \$28,500 was donated for this purpose.

Through the structure of the Ohio University Fund all gifts and donations become deductible for income tax purposes. As a result of these gifts and donations many excellent students are able to continue their education at Ohio University when, otherwise, they might never be able to stay in school or attend college at all.

For an example, take the case of Miss Mary Ann Patterson, who recently graduated with highest honors with a degree of Bachelor of Arts. Miss Patterson graduated with a 3.8 accumulative average, even though she worked in a private home for her board and room. Miss Patterson was active in many organizations and was treasurer of Orchesis. She would not have been able to begin school or stay in Ohio University had it not been for the generous gifts to the Ohio University Fund by donors during the four years she attended.

All scholarships at Ohio University are awarded by the Scholarships Committee which is composed of twelve members of the faculty and staff. The criteria for scholarship awards are:

rank in high school graduating class; score received on the Ohio State Psychological Examination; need; activities; and recommendations.

The Scholarships Committee and the Loan Fund Committee work together in reviewing cases so that an excellent and needy student may be offered some type of scholarship along with a job and perhaps a loan, if the financial situation is such that all three types of aid are necessary.

Under the present financial aids program, a student could conceivably be the recipient of a tuition scholarship, a board job to cover the cost of meals, and a loan to meet the other expenses required during the academic year.

All athletic scholarships are processed through the Scholarships Committee, and the individual coaches make their recommendations directly to the Scholarships Committee. Funds for the Athletic Scholarship Account are derived through contributions from alumni and friends directly to the Ohio University Fund, but ear-marked specifically for athletics.

The Ohio University Scholarships Program has been a very effective tool in helping achieve the high scholastic standard which Ohio University is striving to maintain.

As the university grows, there will be a definite need for additional scholarship funds and a large portion must come from alumni and friends of the university.

EDWIN L. KENNEDY

New Trustee

A PARTNER in Lehman Brothers, Edwin L. Kennedy, '27, was appointed to the board of trustees for a term ending May 13, 1966. Mr. Kennedy replaces Harvey B. Jordon, vice president of the U. S. Steel Corp.

Active in alumni affairs for many years, Mr. Kennedy has served as president of the Ohio University Alumni Association and was the primary figure in re-organizing the Ohio U. alumni living in the New York City area into an active club. This past June he was named head of the O.U. Fund, Inc.

During the new trustee's two terms as national president of the alumni association, he led the way in establishing a financial framework that put the organization on a self-sustaining basis.

Since 1941 Mr. Kennedy has been with Lehman Brothers. As a full partner, he is in charge of the firm's activities in the petroleum and natural gas fields.

He and Mrs. Kennedy, Dora Finari, '12, have one son, Edwin DeWeese.

Faculty Briefs

DR. PAUL G. Krauss, professor of German, was elected vice president of the Modern Language Section of the Ohio College Association at the April Meeting. Dr. John F. Cady, chairman of the History department, was presented the Ohio Academy of History's Award for Historical Achievement in 1958. Dr. Roger Quisenberry, chairman of the electrical engineering department, studied at the University of California in atomic research during the summer.

Three members of Ohio University's Air Force ROTC detachment have

on the green

taken new assignments since last spring. Capt. Robert D. Falkner is in Fairbanks, Alaska, Capt. David E. Wood is at Clark AFB in the Philippines and T. Sgt. Donald E. Cornele is at Craig AFB in Alabama.

Dr. Carl H. Roberts, associate professor of education, was honored by the advisory board of the Ohio Scholarship Tests on his retirement from that board after representing OU for the last 10 years. Dr. Joseph Sligo is the new OU representative to the board. Dr. W. H. Pierce, associate professor of physics, was elected to membership in the National Association for Research in Science Teaching.

Dr. Paul R. Murphy, chairman of the classical languages department, is assistant dean of the Graduate College. For one year he served as acting assistant dean in the Graduate College. Dr. Murphy will supervise the theses reviews and the processing of admission papers.

Registrar Robert E. Mahn spent part of the summer in Washington, D. C. doing preliminary work on a project for the American Association of Collegiate Registrars and Admissions Officers.

Professor in Europe

AN Ohio University professor and his wife left Athens this summer for a year in Lansanne, Switzerland.

Dr. and Mrs. E. T. Hellebrandt flew to Switzerland, where the Ohio U. professor of economics and management has joined the faculty of the Management Development Institute.

Dr. Hellebrandt will be on a year's leave of absence from Ohio U. while teaching at the Institute, directed by Dr. Clark E. Myers, former dean of the University's College of Commerce.

Founded in 1957, the Institute offers a management training program adapted to the needs of European business. It was established under the patronage of the University of Lausanne and is open to men from commercial, industrial or banking firms throughout the world.

While in Europe, Dr. Hellebrandt and his wife, the former Melba White, '18, plan to visit their daughter and son-in-law, Mr. and Mrs. Jack D. Russell, in Budingen, Germany, where Mr. Russell is stationed with the U. S. Army.

Busy Summer Sessions

DURING the summer months the campus wasn't quite as busy as it is during the year, however, there was a constant hum of activity from June until September.

More than six thousand people participated in the 30 workshops, institutes and conferences. Some of the new groups were Boys Staters, the Ohio Library Association, the Hungarian Association of North America, the Institute for College Chemistry Teachers and a Workshop in Special Education.

From the estimated freshman enrollment of 2500 to 2600, there were 2040 incoming students who attended the pre-college counseling. The High School Publications Workshop attracted 1428, and the Buckeye Boys State involved about 1100 high school boys.

Total enrollment for both five-week sessions was 2905, which was about 100 over last summer's enrollment. There were about 40 more sections taught this year than last.

There were six convocations during the summer school sessions. Two men associated with the College of Wooster

(William Craig and Harold B. Smith) and Willy Ley, authority on rockets and space travel, spoke to students and faculty. A male quartet, The Serenaders, and a folksinger, Anne Grimes, and a group who toured the world with Gershwin's "Porgy and Bess" provided musical entertainment.

Three New Buildings In Operation This Fall

VARIOUS physical changes awaited the returning students this fall, and the campus will also look different to alumni returning for Homecoming. The Education Building, beside Putman Elementary School, has been in operation for the past four months. Summer school classes and workshops used this building during the two sessions of summer school.

Also on the lower campus the eleventh and final dormitory in the East Green development was completed in time for occupancy. Three hundred men are housed in this dormitory, which was named Lincoln Hall in commemoration of the sesqui-centennial year of Abraham Lincoln's birth year. This building is on the site of the former Edgehill Cafeteria.

At the other end of campus, on Richland Avenue, is the new Life science building which was named Porter Hall. Dr. James P. Porter was chairman of the psychology department for 20 years. The design for Porter Hall includes a wing in addition to the present building. When completed this wing will be named after William Fairfield Mercer who came to Ohio U. as a biology professor in 1900. He was head of the biology department and professor of geology.

The Science Hall on President St. has been renamed Morton Hall, in honor of Joshua R. Morton, professor of chemistry from 1923-49.

With the completion of the new physical education building, the present men's gym will be converted into classroom and office space. This building will be known as Bentley Hall. Dr. William B. Bentley was professor of chemistry and head of this department for 36 years.

HEAVY EQUIPMENT prepares the base for Ohio University's hard surface runway which has been scheduled for completion the first of October.

PSYCHOLOGY, BOTANY, geology and geography departments are in the new quarters at Porter Hall on Richland Avenue. This \$1,275,000 structure was completed during the summer.

THE MILLION-DOLLAR education building, taking in a whole city block, was used during summer school. In addition to classrooms the building houses a library, seminar rooms and counseling rooms. The dean of education and dean of the graduate school also have offices in this building.

Collection is Donated to OU

OHIO University is the recipient of a book collection valued at about \$40,000, which is being donated to OU by Dr. J. W. Morgan, a retired Wittenberg chemistry professor.

Dean of the Graduate College Donald R. Clippinger said that the collection of more than 1000 books is being presented to Ohio U. mainly because of the graduate program. The graduate school is not so large as to have a number of books overlapping the collection, and it is not so small that the books wouldn't get sufficient use.

Dr. Morgan, who has built up this collection for about 25 years, concentrated mainly on the history of chemistry from 1500-1900. Names like Pasteur, Lavoisier, Cavendish, Priestly and Leuwenhock appear frequently on the publication list.

The collection will be housed in the Cutler Room of Clubb Library as soon as that space is available.

There are few other universities in the country who have similar collections in the field of science, according to Dean Clippinger. This type of collection will form the nucleus around which OU can develop the historical works for all sciences.

Ph.D. In Physics

ABOUT five years ago work began for a doctorate program in physics. This fall the University is offering a doctorate program in cosmic rays, solid state physics and theoretical physics. Dr. Charles Randall, chairman of the Graduate Committee in Physics, said they hope to soon expand into nuclear physics.

Before the department could qualify for such a program there were several preliminaries to deal with. The department needed more space; which they acquired for they now have the entire use of Super Hall. When Men's Gym is converted into classroom space, some physics labs will be housed there. There has been an increase in staff during the past five years. Three new instructors joined the staff this year, making the total 10.

The department now has a physics

library adequate for the research which must be done on the doctoral level. Sufficient equipment and apparatus have been acquired for the program.

In each of the departments offering doctoral programs, there is a vigorous program of study on the master's level. Presently there are 13 students working on their master's in physics. Several of these students are potential for the Ph. D. program and others will be carefully selected, according to Dean of the Graduate College Donald R. Clippinger.

Those students who don't have a master's degree will take graduate course work for about a year before taking examinations to be admitted in the doctoral program. Each candidate works with a staff member in his minor fields and an advisor in his major formulating the course of study.

The Graduate Committee in Physics is composed of: Dr. Randall, chairman; Dr. John E. Edwards, Dr. L. J. Gallaher, Dr. F. B. Stumph and Dr. T. S. Smith.

Reach Retirement Ranks

TWO more members of the Ohio University staff have reached the emeriti rank. Miss Mary Ward, assistant professor of education and supervising critic at the University Elementary School, has served Ohio U. for 37 years. Thomas McKinley Wolfe, who has been a lecturer in commerce for 30 years, is now a lecturer emeritus.

With almost 64 years spent in the classroom (since beginning first grade) Miss Ward has been very active in the education field. She joined OU's staff in 1922 and taught here until 1931, when she went to Columbia University to work on a master's degree. In one year she obtained the degree and returned to Ohio U. as a supervising teacher and instructor in education.

Miss Ward, who became assistant professor of education in 1946, was first vice president of the state organization of the American Council on Education for several years. She has served as consultant to various workshops. Miss Ward plans to remain in Athens, but

also hopes to do some traveling and perhaps go to Alaska.

When Thomas McKinley Wolfe graduated from Smithfield High School in 1915, he enrolled at OU. Four years later he received his bachelor of arts degree. He went to Harvard for his master's in business administration, and became a staff member there for two years.

In 1928 he came to Athens and became a lecturer in commerce. He lectured in investments, business finance, corporation finance and business trends. During this time he was an officer and director at the Athens National Bank, of which he is now president and director.

The top positions of treasurer, secretary and director in the Millfield Coal & Mining Co. and The Sugar Creek Coal & Mining Co. are also a part of this man's career. In 1958 he was named director of the Federal Reserve Bank of Cleveland's Cincinnati Branch.

Mr. Wolfe, who has been the managing officer at the Athens National Bank for the past eight years, will continue his duties as head of the Athens bank.

Sixteen Faculty Promotions

FACULTY promotions effective this term are: Dr. Paul G. Krauss from associate professor to professor of German; form assistant professor to associate professor are Dr. Ray Dawson, Dr. Roy Fairchild, Lowell B. Howard, Christopher Lane, Dr. John T. McQuate and Dr. Robert F. Sympton. Marjorie Malone was promoted from lecturer to associate professor of music education.

Instructors promoted to assistant professor are: Paul Bjerc, Judith Makroczy, Dr. Robert F. McDonnell, Dr. William E. Morris, Thomas C. Sarchet, Robert L. Shrigley, Anthony G. Trisolini and Earl Weber.

Indian Student Edits Paper

FOR the first time in the history of the Ohio University Post, the publication had a foreign student as editor. Ramesh Sattawalla, a senior journalism major from Bombay, India, was in

charge of the eight issues of the Post during the two summer sessions.

Coming to Ohio U. in February of last school year, Ramesh had studied for three years at St. Xavier's College in Bombay. By attending both sessions of summer school, Ramesh will receive his bachelor of science degree in journalism in February.

Following graduation Ramesh plans to get practical experience in journalism for about six months. He then plans to go to Europe for further study in preparation for work with the foreign services.

RAMESH SATTAVALLA

New Administration

A NEW academic dean, a personnel dean and an assistant assumed their position July 1.

Paul L. Noble, a 1942 graduate of Ohio University, is dean of the College of Commerce. He succeeds Dr. Karl H. Krauskopf who was acting dean of the College of Commerce for the past two years.

Dean of Men William R. Butler received his bachelor of science in education degree at OU in 1950 and his master's in 1951. His doctorate was obtained from Kansas University. Dean Butler replaced Dean Maurel Hunkins, who was dean of men at OU for 12 years. He is now director of special services.

Ohio University's Assistant Dean of Men Paul Schofer has spent 18 years teaching, coaching and counseling in Ohio high schools. A native Ohioan, Paul Schofer received his bachelor's in education from Wittenberg. He taught in high schools in Wapkoneta, Hamilton and Massillon before taking a position at the University of Kansas.

While at Kansas he was assistant football coach and athletic counselor. In 1958 he received his masters from the University of Kansas. During this time he became acquainted with Dean Butler.

During the past school year, Schofer was the guidance counselor at Boca-Ciga High School in St. Petersburg, Fla.

Assistant Dean Schofer has a married daughter in Minneapolis. His wife and two sons, 19 and 13, are with him in Athens.

DEAN BUTLER, DEAN NOBLE AND ASSISTANT DEAN SCHOFER

EXECUTIVE DEVELOPMENT CLASS

Sept. 26 — At Toledo (night)
 Oct. 3 — Kent State
 Oct. 10 — Xavier
 Oct. 16 — At Youngstown
 Oct. 24 — At Miami
 Oct. 31 — Western Michigan
 Nov. 7 — At Marshall
 Nov. 14 — At Louisville
 Nov. 21 — Bowling Green

Bobcat Roundup

By Rowland Congdon, '49

A 51-MAN squad which includes only four seniors raises some apprehension among Coach Bill Hess and his staff as to whether the 1959 Ohio University football season can be a successful one.

But other observers close to the football scene feel that the coaches are displaying what most fans credit coaches with showing—perennial pessimism.

When inexperience is claimed because of having only four seniors, the coaches seem to have a logical explanation for their stand.

But a closer look at the roster shows that 16 lettermen are included. Most of these are, of course, juniors who bore the brunt of bringing Ohio U. its first winning season in three years with a 1958 record of 5-4.

They are also well-schooled in the Hess-type of offense, the Power-T.

To back up these "veterans" are 26 sophomores, at least four of whom stand a good chance of being in the starting lineup in the Bobcats' opener at Toledo the night

ORDER BLANK ERROR

The football ticket order blank appearing on the back cover of the June *Alumnus* erroneously lists Toledo University as the Bobcats' October 3 opponent. The game in Athens on that date is with Kent State, as indicated in the schedule on this page.

of September 26. Conversely, only one senior might be starting the season as a member of the first unit.

Sophomores likely to break into the first eleven are Jack Kiewit at left end, Mike Kielkowicz at left tackle, Clyde Thomas at left half and either Otis Wagner or Bill Hendren at quarterback. The lone senior expected to be among the starters is Paul Erdy at right tackle. Bob Wisniewski at quarterback and Joe Trevis at left tackle, however, could edge their way into starting spots.

The first unit at the start of fall practice September

1 included one senior, eight juniors and two sophomores. This alignment was established on the basis of showings in spring practice.

Again, the coaches base their reasoning on the lack of an experienced quarterback. This is a logical stand as the signal-calling post is probably the most important on the team.

Dave "Bucky" Wagner is No. 1 at this spot at the opening of practice. Though a junior, he did not see enough action last season to earn a letter. He showed better than any of the others at the position in spring practice, however.

Immediately behind him are Otis Wagner (no relation), Bill Hendren and Bob Wisniewski. The latter is actually the most experienced of the lot, being a senior and earning a letter as quarterback understudy in 1958. But he was an end in 1957 and has seen only limited action at the spot. Also, he was not in school last spring and missed practice then.

Both Otis Wagner and Hendren are considered by the coaching staff as top-notch future prospects who merely lack experience.

Despite the fact that Hess teams are not noted for their aerial attack, the Bobcats are nevertheless "taking to the air" this season.

Completion of a paved runway at Ohio University's airport on East State Street will enable planes large enough to transport athletic teams to use the airport. So the Bobcats will fly from Athens to the Toledo, Youngstown and Louisville games this fall if visibility permits. There is as yet no instrument-landing facility at the airport.

The Toledo and Youngstown games are both at night which will enable the team to leave Athens that morning and return immediately after the game.

Another innovation connected with football this season is that a parking fee of 50 cents will be assessed in stadium lots. The proceeds of this fee will go to the athletic scholarship fund.

OHIO UNIVERSITY BOBCATS

(16 lettermen — 4 seniors, 21 juniors, 26 sophomores)

alumni scope

1899

GILBERT A. BENNETT retired the first of this year at the age of 85.

1902

CHARLES J. EDDY has retired and lives at The Plains.

DR. AND MRS. JOHN R. SPRAGUE celebrated their 50th wedding anniversary in June.

1904

FLORA CONNER STAMMEL, a registered nurse, has retired and is living in Cincinnati.

FRANK L. GROVES, who was southern district superintendent for Columbus and Southern Ohio Electric Company for 35 years, has retired and is living in Springfield.

1905

ARTHUR D. CARR has been a medical doctor in Washington, D. C. since 1912 and has been a clinical instructor emeritus in pediatrics since 1948.

1906

ETTA MCDANIEL COX of Columbus has been a bookkeeper and stenographer for 10 years.

JOHN C. PHELPS who was superintendent of the electric and water plants in Sabina, retired in 1951.

1907

FRANK C. FRYBURGER is presently with a testing engineers concern in Cincinnati as a technician.

1908

HENRY WORK LEVER has retired and is a ranch operator in Madras, Oregon.

FRED B. SCOTT has been retired for almost six years. He is secretary of the board of trustees for the First Methodist Church in Cleveland.

1908

SARA CLARE HUMPHREY was a teacher of English and chairman of the English department at Scott High School in Toledo for 22 years.

1909

FREDERICK B. HILDEBRAND, who retired from teaching in 1940, sent his regrets at not being able to join his classmates at the reunion.

LULU BRICKLES BRAWNER gives private piano instruction in Atlanta, Georgia.

BESSE DRIGGS LEACH has made trips to Mexico, South America and around the world.

NELLIE McNUTT BROWN retired from her position as state supervisor of employment counseling at the Ohio State Employment Service in 1955. She and her husband, who is also retired, live in Fort Lauderdale. She was voted one of ten Women of the Year in her county. The Browns spent last winter in Honolulu.

1910

FRANK B. KURTZ is regional manager for Marlin Industrial Division in Birmingham, Michigan.

1911

HARLAN J. DICKERSON and his wife, ANNA PORTER, '15, spent the winter in Tucson visiting their daughter and her family.

1912

EDITH M. McCORMICK had an operation the first part of the year and has been recuperating at home in Santa Barbara, California.

ROLAND STEMEN BROWN is employed by the Brown Milling Company. He resides at Strayer Ave., Bremen, Ohio.

PROFESSOR HARRY L. RIDENOUR is professor emeritus of English literature of Baldwin Wallace College, Berea, Ohio. He frequently lectures throughout the country.

ELLA BUCH, who taught for 44 years, is a retired high school Latin teacher. She has traveled in Europe, the Western U.S. and Canada.

1914

EDWIN W. BASH has retired. He and his wife live in Lorain, but have taken trips to Arizona and Florida.

ANNA K. PICKERING retired from school teaching three years ago.

LOUISE PRICE is a counseling psychologist for the Department of Personnel Service in Brooklyn. She has also completed research on the problems of married students at Brooklyn College.

CHAUNCEY A. PLYLEY is a counsellor at law and is practicing law in New Jersey.

ALBERT T. SMITH has been retired for six years and is living in Irwin, Ohio.

VIRGINIA CRISENBERRY HARDING is receptionist in her husband's real estate office in Delta, Colorado.

ERNEST C. WILKES, a chemist for the Ohio Department of Agriculture for 29 years, retired in 1955.

CLARA F. SHILLIDAY retired from her position with the physicians' and registered nurses' official registry in Charleston.

W. CARL CHEESEMAN is president of the Community Finance Company in Butler, Pa.

ESTHER M. GREISHEIMER is a research professor of anesthesia at Temple University school of medicine in Philadelphia.

FRANCES MILLER HARRINGTON is a case worker for the State of Ohio.

MAYME L. RUTLEDGE HAUGHT has been an English instructor at a junior high school in West Virginia for 15 years.

1915

LOUIS FOLEY, chairman of the Department of English at Babson Institute of Business Administration, Babson Park, Mass., spent the month of September in France. He and his wife made the European trip following a summer at Ecole Champlain, a French-language summer camp for girls at Ferrisburg, Vermont. The Foleys have been associated with the camp for many years. A frequent contributor to the Ohio Alumnus magazine, Mr. Foley is author of four books and more than 350 articles for English and French language magazines. He has been editor of The Emerald of Sigma Pi Fraternity since 1945.

IRENE ABER, a retired teacher, is dividing her time between her two homes, one in Huntington, W. Va. and the other in St. Petersburg, Fla.

1916

CHRISTINE HUMPHREY retired last year from teaching and is living in St. Cloud, Fla.

LELA A. EWERS took a four month trip around the world last year after retiring from 25 years as professor of biology at Cottey College.

ALEX C. KERR was honored by election to membership in the Pilgrims of Great Britain, of which the Queen is a patron. This is a great honor for an American in London.

FLOY ARTHEKHOLT OSBORNE has retired from teaching after 25 years.

ERNEST R. BECK, who had been assistant superintendent of Franklin county schools for the past 35 years, has retired. He spent 57 years in various educational positions.

IDA G. BAUMAN was secretary for W.L.E. Geerley in New York. She now plans to move to a country place.

1917

BEN F. LENT is a civil engineer in a government office in Oregon.

ISABEL WALKER BOWEN is a staff nurse at Bethesda Hospital in Zanesville, Ohio. She spends her vacations in California visiting her son.

EDITH A. BUCHANAN, a retired Youngs-

town teacher, lives at 1100 W. Washington Street, Baltimore, Ohio.

ANNA M. BUNGER, who retired in 1952, taught for 26 years in the department of special education, Eastern Michigan University, Ypsilanti, Mich. She also held positions in Toledo and New York City. She is the author of the textbook, "Speech Reading - Jena Method."

1918

JOSEPH L. TREON is assistant manager for the International Sales Division of the Standard Register Company in Dayton, Ohio. Before joining the business world in 1922, he taught eighth grade for three years.

1919

ETHEL WELSH retired from the Cleveland Public School System in 1954.

ISABEL E. BACON is a retired teacher living in Youngstown.

MERRILL L. DENNIS has completed 44 years of teaching service all in Jefferson County as teacher, principal and superintendent in Adena, County. His overseas travels have taken him to Scotland, England, France and Spain.

INEZ FRENCH LAIB is an art teacher in Warren.

MELBA WHITE HELLEBRANDT and her husband will spend the coming year in Lausanne, Switzerland with the management school under the direction of Clark Myers, former dean of the college of commerce at OU. They plan to return to Athens in August, 1960 by way of Japan.

JULIA L. CABLE, who retired from OU's psychology department, is a part-time staff aide with the Red Cross and a part-time Gray Lady at Sheltering Arms.

1920

BEN F. FULKS is a retired high school principal. He and his wife, Bessie Darling, '19, have done some traveling during the past two years.

CHAUNCEY O. RIDENOUR has retired from the Pennsylvania State University English department after 39 years there.

FRANCES BALL has retired and lives in Tucson, Ariz.

EUNICE E. BROYLES is an instructor in political science at Taft College, Taft, Calif. She was also the co-chairman of the division of humanities, Taft College.

1922

PAULINE WALDEN is executive director of the Firelands area of Girl Scouts in Norwalk.

FRANCES HATCH is a receptionist in the office of admissions at the Univ. of Chicago.

ORRIS B. BARBER is business manager of the Hunting and Fishing Plantation. He lives in Barnwell, South Carolina.

1923

EILEEN WAGONER is a teacher at Mid-Pacific Institute in Honolulu.

DR. HOWARD P. LONGSTAFF is professor

of psychology and an industrial consultant with the University of Minnesota.

LEE BRYAN BAUER, principal of the John Marshall High School, has been in that position for the past 13 years. He and his family live at 17809 Indianola Dr. Lakewood, Ohio.

1924

VELMA VANCE is a department store buyer for H. & S. Pogue Co. in Cincinnati.

ELIZABETH PRICE SWAIN is a teacher at Westerly elementary in Bay Village.

SARA FITTON BERLIN has been active in the YWCA in San Diego. She is also past province president of Alpha Xi Delta.

NADINE MICHAEL JENNINGS has been a mathematics teacher at Central High in Akron for five years.

VARELIA HOLLETT FARMER is assistant to the director of the Cleveland Public Library. She has been on the staff for thirty years.

OLIVE KINCAID TULLY, chief dietitian at Queens Hospital Center, is a member of the Food and Nutrition Council of Greater New York.

for his 25 years of service with the Ohio Farm Bureau Affiliated Companies last May.

LUCILE DUFFEE has retired after 40 years in the teaching profession, 31 of them in the Athens system.

HAROLD W. BODE is an executive for F. W. Woolworth Co. and lives in Scarsdale, N. Y.

VERA IONE BELL STEWART is secretary to the superintendent of the Licking County TB sanatorium, Newark, Ohio.

1926

ARTHUR E. CAMERON is in financial planning in Palo Alto, California. He sends his good wishes to alumni and friends.

HAZEL R. McDONALD is a school social worker in Oak Park, Ill.

DONALD E. McMICHAEL is president of Beneficial Management Corp. in Morristown, N. J.

HELEN GLEASON is supervisor of the Uni-

PRESIDENT AND MRS. JOHN C. BAKER show Ernst Von Dahnanyi and his wife the gift given them by the Stark County Alumni Chapter. It is an album with the recorded works of Dahnanyi, one of the world's greatest living musicians and annual visitor to the OU campus since 1948.

EDITH TONJES TAYLOR has been president of the P.T.A. in Wenatchee, Wis., for two years.

ISABELLE WORK is a member of the teaching staff of the OU Teacher Education Project in Nigeria. During Feb., March and April she traveled over 5500 miles in the Western region of Nigeria.

DAVID D. FRENCH is judge in the Municipal Court in Santa Ana, Calif.

MAYME BEAVAN, who taught school in Steubenville for 35 years, has retired this year after 46 years of teaching.

1925

CLINTON S. POSTON received a gold watch

for his 25 years of service with the Ohio Farm Bureau Affiliated Companies last May.

LUCILE DUFFEE has retired after 40 years in the teaching profession, 31 of them in the Athens system.

1927

KARL B. JEFFERS is a captain on the director's staff at Bethesda, Md.

LEONOR POMEROY BONNER is executive director for Buckeye Hills Girl Scout Council.

HELEN V. BOYD taught at Pikeville College in Kentucky during the summer. She has retired and is living in Reynoldsburg.

DR. CARL ROBERTS was honored by the advisory board of the Ohio Scholarship Tests on his retirement from the board after representing OU for the last 10 years.

MABEL LONG COLBURN is teaching home economics in the Medina City School system.

1928

C. DUDLEY FOSTER, regional manager of General Electric "Live Better Electrically" program in Cleveland, is president of the Cleveland Advertising Club.

JOSEPH A. BOLMAN, who is postmaster in Shinnston, W. Va., has been with the postal service for 19 years.

WILMA COWAN BRADY is retired and now living in Florida in the winter and spending a few months in the North in the summer.

1929

GLENN P. SMITH is office manager at the Jai Lai Cafe in Columbus.

HAROLD C. WAGNER is vice-president and treasurer of the Century Federal Savings Association in New York.

HELEN GLEASON SCHODORF is a substitute teacher in Willard Schools.

RACHEL LEWIS BAILEY has been an accounting clerk at Ohio Steel Foundry at Springfield.

NORMA PHILLIPS WILLIAMS and her husband live in Urbana where he is pastor of the Methodist Church of Westville-Concord.

S. R. BOBENMYER is principal of Middle School in Shaker Heights.

CLARENCE A. KUHNER has been head of the Geography Department at Clarion State Teachers College for 24 years.

CARL E. WILLIAMS is head of the social science department at New Philadelphia Senior High School. He is also vice president and director of The Tuscarawas Valley Loan Co. and director of The Peoples National Bank and Savings Co.

AGNES LUCILLE LEE is on the Board of Education at Youngstown.

ORVILLE R. KELLEY is a pathologist in Wausau, Wisconsin.

FRANCES E. EVERHART is first vice president of the Greater Cleveland Chapter of Retired Teachers.

HELEN WATSON RAMSDEN directs the Senior Citizens Group for Adult Education in Belmont, Vermont.

ANTON BREINICK, JR. is manager of the Traffic and Order Service in Mansfield.

LOIS MILLER BERNDT is secretary of the Dowell Division of the Dow Chemical Co. in Cleveland.

1940

ROBERT M. DOGGETT is in Weisbaden, Germany.

DORAN SAUERS, JR. is manager of Carrollton & Waynesburg offices for Ohio Power.

WADE E. SHURTLEFF is director of community relations for East Ohio Gas Co.

DWIGHT DILLER is a high school journalism instructor and assistant athletic coach at Logan.

ROBERT GARN is with Central Farm Fertilizer in Chicago.

WINONA STOCKHAM SKAGGS is an inspector in a printing and lithographing plant in Norwood, Ohio.

DONALD HOUSE resigned from the Jackson High School staff and is now chairman of the science department at Mad River High School near Dayton.

1941

JANE EAKIN KLEIMAN had a showing of her paintings in Paris and London during the summer.

VERA MYERS SCHLETZER received the master of arts degree in differential psychology from the University of Minnesota in June. She will continue study there while working as a research fellow in the industrial relations center.

GUSTAVE SARIDAKIS is an inspector at the International Cooperation Administration.

ELIZABETH BUDDY DAVIS is living in Japan.

RICHARD NORTON SCOTT is branch manager for Remington Rand Univac in Seattle, Washington.

BERNARD H. WITSBERGER is an instructor in French and Spanish at Defiance College.

WILBUR M. SADLER is executive secretary to the Hon. Hastings Keith, Mr. Sadler formerly was with The Christian Science Monitor, Boston, Mass.

WILLIAM SHANNON MACNAMARA, who is a pilot, is assistant chief of the Investigation Division, Bureau of Safety, Civil Aeronautics Board, Washington, D.C.

NORMAN I. BASS is sales manager of the Melbee Jalousy Company in Cleveland, Ohio.

DANIEL RISALITI is head football coach at Tinken Vocational High School in Canton, Ohio.

found it necessary to make some corrections. I had called Alexander Jester James Jester, had had the two women who would have been twelve and fourteen at the time six years old, and had put in their mouths the testimony of another witness. I had also given Jester Gate's wagon and Gates Jester's wagon. And all this with the same confidence with which the witnesses presumably gave their testimony.

One of the hardest lessons for most of us to learn is that the feeling of certainty we have is but a poor criterion of the accuracy of our recall.

In conclusion, it would be desirable to explain what happens in the nervous system when we remember.

We once had a neat and simple explanation in terms of the lowering of resistance at the synapses and consequent pathways of easier conductance. The consciousness of idea A will recall idea B because the nerve pathways between the centers or clusters of cells in the brain correlated with A, and those with B, have open pathways between them.

Lashley's work raised a doubt as to whether there are centers or clusters of cells connected with specific items of learning. He found that the loss of learned behavior in rats was unrelated to the location of the destruction of cortical tissue.

Also the Gestalt psychologists inveighed against the prevailing atomism, emphasizing the wholeness of behavior, and the wholeness of brain action. They preferred, as an analogy, something like the play of light and shadow over a field, rather than the older switchboard analogy.

But Lashley's work was with rats, and the Gestaltists were never very convincing neurologists. Penfield and Kas-

mussen, in their book "The Cerebral Cortex of Man" have described experiments in electrical stimulation of the cortex in patients having brain operations under local anesthesia.

The patients were conscious during the operation. In some instances electrical stimulation of certain points on the brain produced definite memories. In one case it was a memory of a familiar song, in another, of a childhood experience. This led them to suggest that memories might have fairly definite projection centers, or at least triggering centers in the brain, just as do motor and sensory functions.

Still others have suggested that recall may depend on temporal arrangements of volleys or pulsations of nerve impulses, so that recall becomes a sort of tuning in.

W. Grey Walter in his book "The Living Brain" speaking of the effects of visual stimulation with flickering light says that in some patients, and in certain mental states, flicker frequencies can be found at which overpoweringly vivid memories suddenly appear. He speaks of the possibility that memories may be recalled by other memories having similar frequencies. The study of memory thus becomes an exercise in harmonics.

A guide at the Mammoth Caves was once asked whether the cave was artificially ventilated. Knowing the meaning of neither artificial nor ventilate he replied in pontifical tones "That, my friend, no man knows", and I am afraid that that is the answer. Like Omar of old, we must come out the door where in we went.

Without looking back, if you were asked to testify about facts concerning the photograph you saw beside the headline—the one of the girl in the car—how would you answer these questions: Were there any other vehicles in the photo? Was there a mirror on the car? Was the vent window open? Was the girl wearing a light or dark blouse? How many roads were there at the intersection? Is there a house in the photograph? On which side of the road is the mailbox?

1942

NEWMAN W. POWELL received the doctor of philosophy degree at commencement at Stanford University. He is associate professor of music at Valparaiso University, Ind.

G. ALBERT GARDNER, who has been teacher and school administrator at Ames-Beru for the past 25 years, is the principal of Athens Junior High School. He and his family reside at 35 Grovesboro Street.

JOHN E. BAILEY, JR. is employed by the Amco Drainage & Metal Products, Inc. as a division accountant. He is married to the former Dorothy Roads, '44.

JOHN C. FULTON was one of the participants when corporate membership certificates in the Armed Forces Management Association were presented in a ceremony at the Army and Navy Club, Washington, D.C.

DR. ELIZABETH F. TULLER has been promoted to associate professor of chemistry at Western Michigan University.

JACK PRITCHARD is now a Lt. Col. in the Army.

REV. RAY CHARLES GREENE, former pastor of the East Main Street Methodist church in Newark, has been appointed pastor of the Centerville Methodist church. He

has also served in Methodist churches at Germantown, Portsmouth and Wellston.

1943

The Army Reserve in Parma was dedicated in honor of LT. KINGSTON H. MOTE who died in combat in Europe during WW II.

ROBERT E. CRAWFORD is pastor at the Mariemont Community Church in Cincinnati.

WARREN CLEIL is associated with Arthur Andersen & Co., accountants and auditors, in Pittsburgh.

FREDERICK MCBEE manages two theatres and three drive-ins in Finley.

BARBARA FISHER ASHTON is assistant director for the division for continuing education at the University of Kansas City. Her husband died in June of 1956.

ROBERT JOHNSON is presently teaching psychology, sociology and world history in the Bryan High School. He is married to the former Alice Davis, '46.

RICHARD RALPH ADAMS is technical superintendent of the Goodyear Tire and Rubber Co. in Alabama.

1944

DR. PAUL DIDION is a veterinarian in Jefferson, Wisconsin.

ELEANOR JEAN MORGAN is an art supervisor in Cuyahoga Heights Schools.

CHARLES W. BULLARD is an associate professor of economics in North Dakota.

LEWARD A. HALLOCK, JR., has been in the service since 1941, and is a lieutenant commander in the guided missiles division of the Navy.

ROBERT T. MORGAN has been practicing dentistry for 11 years in Cincinnati.

NANCY COUNTS PANGCOAST has taught kindergarten in Galion City Schools for the past three years.

BARBARA HANKINSON DOWNHOUR is a business education teacher at Carbon Hill.

VERNON HACKER is a surgeon in Euclid.

CHARLES N. RUSSON is supervisory of work standards with Dummens Diesel Engines.

ESTHER RIGGLE LAPP is a teacher of special education in Coshocton.

ROBERT M. RHOADES is a member of the South Euclid-Lyndhurst Board of Education

Alumni Secretary

Visits Western Chapters

The day after the Alumni Reunions, June 7 of the commencement weekend, Alumni Secretary Marty Hecht and family began a tour of the OU Alumni centers in the West.

The first day's travel took the Hechts to St. Louis, where they were the over-night guests of Mr. and Mrs. Marlette Covert. They also had the opportunity to visit with Mr. and Mrs. Robert Snyder while they were in St. Louis.

By Tuesday, June 9, Marty and family were in Albuquerque, New Mexico. Thirty-six alumni attended the meeting at La Hacienda in Old Town. The group gave Mrs. Hecht (Jean Righter) a hand-painted tray as a remembrance of the stay in New Mexico.

After visiting Grand Canyon, the

Hechts went to Phoenix for a dinner-meeting at the Ramada Inn. Harris A. Wood was chairman of the affair and 26 were present. After the meeting the group went to Don Roush's home for the evening.

Fifteen members of the Board of Directors for the Southern California Chapter had their dinner meeting at the Knotts Berry Farm in L. A. The following day, June 15 was the 1959 reunion of Southern California Alumni at the Los Angeles Athletic Club. Marty spoke to the 168 people attending, gave a showing of the OU Homecoming film and installed the new officers for the coming year.

Following the business meeting, Morry Rabin acted as toastmaster for the entertainment. President Edgar Shoemaker presented a \$100 check to Mr.

Hecht for the OU Fund, a gift from the Southern California Chapter.

The Hechts also got to see Disneyland, and visited with Irving Shulman at Warner Bros. Studio before going on to San Francisco. Sight seeing in California also included trips to Yosemite and Sequoia National Parks.

On June 17 and 18 the Hechts were in San Francisco, staying at the Hotel California as guests of the William Keplings. They visited backstage with Howard Wendell, who was playing in "Once More With Feeling." On Friday an alumni meeting was held in San Francisco at Panellia's Restaurant with T. Henry Ivory as chairman. The group elected officers for the coming year.

Saturday, June 20, the Hechts were in Portland, Oregon. Twenty-five OU alumni attended the meeting at the Aero Club and William J. Manning was chairman. Marty showed the OU movie to the group.

The next day Marty attended the alumni meeting in Seattle, Washington at the home of Robert C. Wetherholt. Then on to Missoula, Montana and a few days stay at Yellowstone National Park. While in this spot they saw John Lent (one of the authors of the Alumni History which appeared in the June issue) who was working in this area during the summer.

On the way to Denver, Marty and family stopped off at Salt Lake City. On June 29 the Denver meeting was held at Henritze's. Marty showed the movie to the 20 attending alumni. Earl T. Watkins was chairman of the event and Dr. J. M. Robinson was host. J. Clair Evans, '01, spoke to the group.

Forty people attended the Kansas City meeting on July 1, which began with a pot-luck dinner at the home of Dr. and Mrs. Fred Kittle. Bob Bird served as chairman. The Hechts stayed at the Whitehaven Motel as guests of the club.

En route home, Marty attended the July 2 meeting of the St. Louis alumni chapter. Twenty-five attended this meeting and officers were elected. Hechts were again the guests of the Coverts, as in the start of the trip.

After approximately 8,000 miles, Marty, Jean, daughter Holly and son Ross arrived in Athens July 6.

SOUTHERN CALIFORNIANS hear Morry Rabin, '36, introduce Jim Wisda, '09, in the top photo taken at the June meeting in Los Angeles. From left are Mrs. Martin L. Hecht, Mr. Hecht, Mrs. Rabin, Mr. Rabin and Mr. Wisda. Photo was taken by Chic Donchin, '51.

and the General Electric Speakers Bureau.

SUZANNE REA is an English teacher at Fairmont High School in Kenting.

MARY ALLEN DAVIS is editing the quarterly magazine for the Ohio Federation of Women's Clubs.

CHARLES W. BAUGH is with Westinghouse as an engineer at Drexal Hill, Pennsylvania.

1945

JUNE HILL PEDIGO is in the admissions office at the University of Chicago.

TED CONOVER is publisher of The Centerburg Gazette.

ROSALIE FONOROFF is a secretary in the social science division of The Rand Corp. in Washington, D.C.

DR. ROBERT RUDOLPH, recently resigned from the U.S. Air Force Strategic Air Command, will open medical offices in Marietta and will make his home there.

LT. ROBERT C. MARKS is a co-pilot (B-47) stationed at Pease A.F.B., New Hampshire.

JOHN V. PEZZONI is a personnel assistant with The Pennsylvania State University.

Homecoming Buffet

ALUMNI SECRETARY Marty Hecht has added a new feature to Homecoming that will be good news to returning alumni. A buffet luncheon will be served at 11:30 a.m. in the University's ice rink, just a minute's walk from the stadium.

This means that alumni not only will have a handy place to eat lunch before the game, they will have a central meeting place big enough to accommodate all those who come back to the campus. The ice rink was used at last year's Homecoming for an alumni coffee hour and it proved successful enough that Marty decided to expand it to a buffet lunch.

The ice rink is located in what was deep left field of the old baseball stadium. A suggestion from Marty is that alumni park at the stadium (the fee is 50 cents there), so that their cars will be close to the central meeting place.

If an alumnus does not arrive in time to see the downtown parade, he still will get a chance to see the floats in a "float review" in the stadium, just preceding the game.

Marty reports that there will be plenty of time to attend the alumni luncheon and still get to the stadium in time for the review.

REX McCLURE is in steel tubing sales for Miami Industries, Inc. in Piqua.

RICHARD A. BARROS is a fighter pilot in Southern Japan.

EARL P. DUPRE is a cost analyst for the Fauldless Rubber Co. in Ashland, Ohio.

MARY PATRICK MOLL and WILLIAM SHARP received a master of arts and a doctor of philosophy respectively from OSU in June.
